

Wetwall.

SHOWER PANELS

The finest selection of shower panels in the world.

We've been making Wetwall, the UK's best selling shower panel, in our base in Perthshire, Scotland for the last twenty-five years and we still design, build and test all our Wetwall panels on site.

Our Panels, Splashbacks, Vanity Units and Flooring now all come with a 15 year no fuss guarantee and we are constantly adding new colours and decors to our ever expanding ranges.

WHAT MAKES A SHOWER PANEL

1. The Panel

Our panels are constructed by bonding High Pressure Laminate (HPL) to a core using a PVA (D4 rated) adhesive system to give a completely waterproof surface.

This meets all the requirements of EN438.

A balancing laminate is bonded to the reverse of the panel also using the PVA adhesive system. This ensures the panel's structural stability.

2. Trims

These ensure our system is fully waterproof and also ensure that the panels look fantastic.

For our acrylic system we now offer fully colour co-ordinated trims meaning that every visible edge of your shower panel matches beautifully.

For our laminate system our trims are available in black, white, satin anodised or, to match most bathroom hardware, a beautiful chrome finish.

3. Bottom Seal

Our bottom seal works in conjunction with silicone sealant to ensure a beautiful waterproof finish.

4. Adhesive

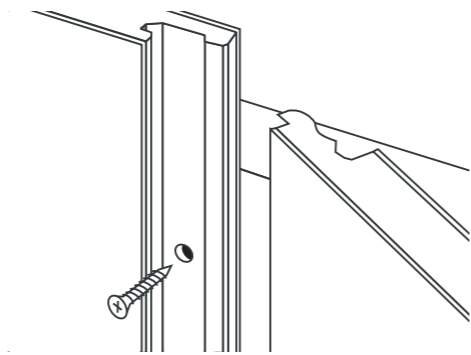

Our Wetwall adhesive is designed to produce bonds that can withstand high temperatures, remain flexible even after curing and resist chemicals including water.

5. Sealant

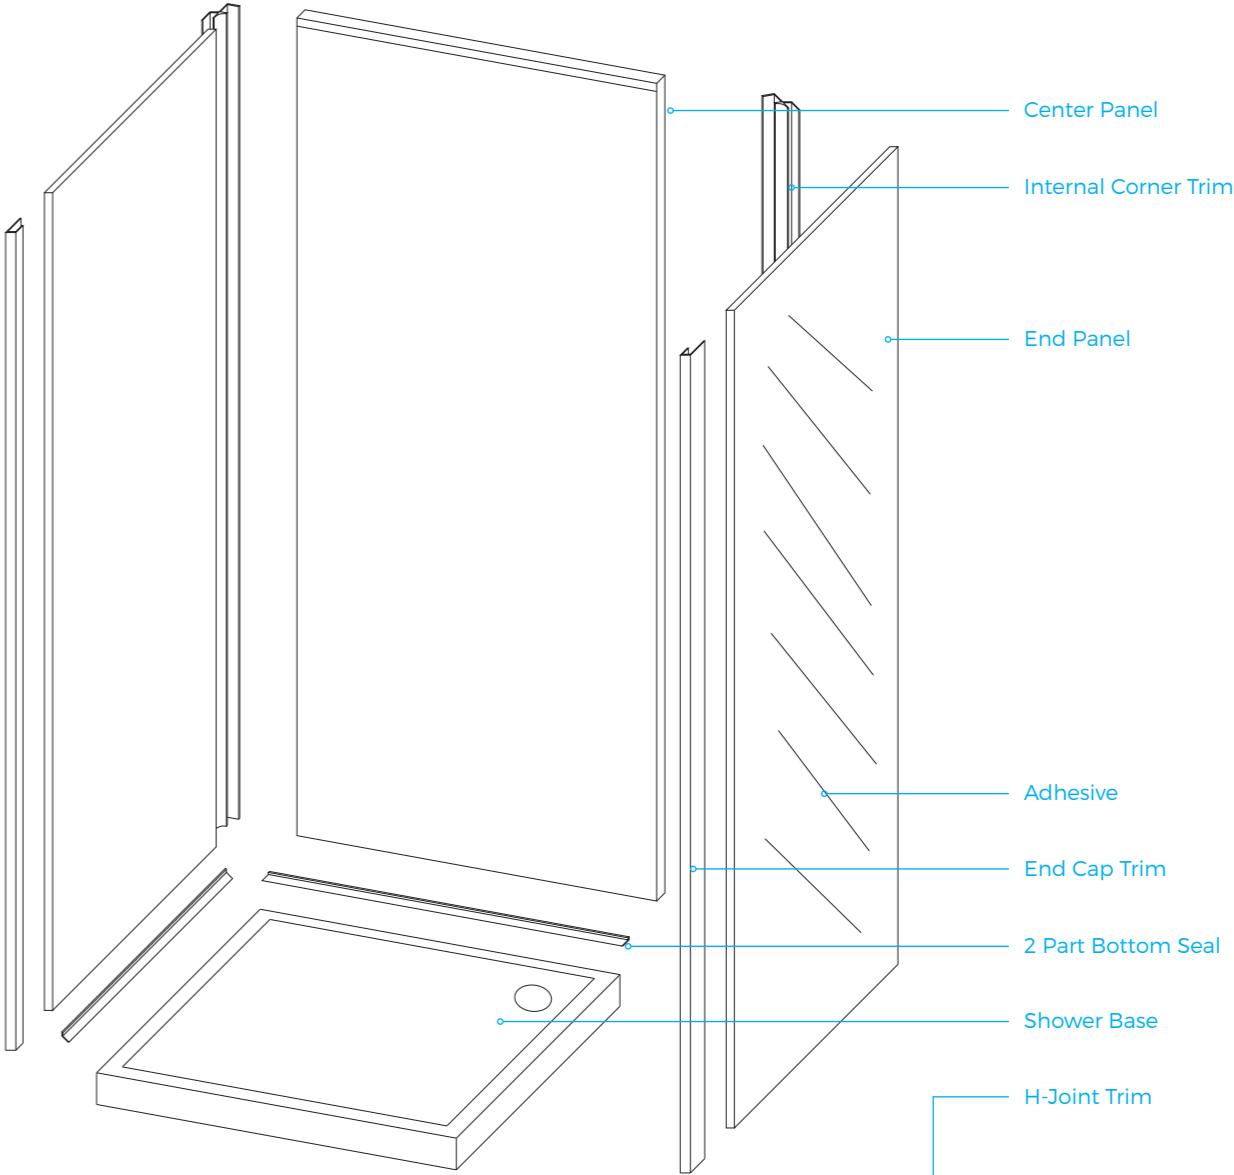

Our Wetwall sealant is mould, steam and water resistant, easy to apply and will ensure your system remains waterproof throughout the panels lifetime.

6. T&G Option

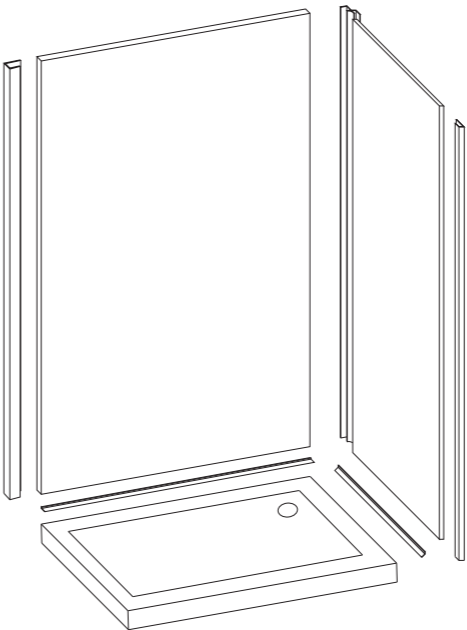

A tongue and groove option is also available.

2 PANELS IN A CORNER

SQUARE EDGE WALL PANELS

BENEFITS OF OUR SHOWER PANELS

Waterproofing

Our panels are constructed by bonding High Pressure Laminate (HPL) to the core using a PVA (D4 rated) adhesive system to give a completely waterproof surface. Our panels therefore meet all the requirements of EN438.

Our Trims

As well as our classic finishes we also offer fully colour co-ordinated profiles for our Acrylic and Ceramic ranges meaning that every visible edge of your shower panel matches beautifully.

Our Experience

All our panels are made on site just as we have done since we first went into business over twenty-five years ago.

It's this expertise which keeps us at the top of our market and ensures that every panel manufactured today is made to the same high standard that we have maintained over the last twenty-five years.

Our 15 year guarantee

Our panels are guaranteed to remain watertight and waterproof for fifteen years from your date of purchase. No small print. As long as they've been installed correctly, we're that confident of our system.

15
YEARS

No Grout

Unlike tiles no grout is required to fit the Wetwall system, which means that our panels require very little maintenance to keep them looking clean.

Antibacterial

A selection of our laminate shower panels are now available in our patented Antibacterial Coating. This is incorporated into the panel during the production process and means once bacteria comes into contact with the surface the bacteria basically die.

Look out on the colours pages to see which panels are **available**.

Innovation

We are committed to using the most modern materials when making our shower panels.

Such as our new and unique Ceramic and Acrylic panels, whilst our laminate panels are a great cost effective alternative.

You'll save some time

The Wetwall system is so much quicker to fit than conventional tiles that you may find yourself with enough time to put your feet up and relax.

You'll save some money

Unlike with tiles an expert fitter is not required to fit the Wetwall system. This means it takes less time to fit and as an expert is not required, on average it makes the Wetwall system around 25% cheaper than tiles.

OUR SHOWER PANEL RANGE

Our range of materials is the best on the bathroom market. We have spent years sourcing the finest materials around the world, and our teams knowledge is second to none.

Our new **Ceramic** shower panels have the look and feel of genuine ceramic, but with all of the benefits of the Wetwall system.

Acrylic shower panels are available in two finishes, a beautiful glass like gloss and stunning matt. The range includes solid, metallic and digital decors.

Our **Laminate** panels range is still our best seller, with designs that are as beautiful as they are practical. Whilst **Composite** panels are for those who want the traditional look of tiles.

Glass

Stunning top of the range shower panels and splashbacks

- Stunning solid glass
- Beautiful colour range
- Installed by our experts
- No mould
- RAL Colour Match

Ceramic

Make a statement with beautiful ceramic

- Genuine ceramic
- Natural matt finish
- Installed quickly and easily

Flooring

Designed to perfectly work with all our shower panels

- Installs with no glue or grout
- No mould
- Saves money compared to tiles

Vanities

Vanity Units designed to complement your shower panels

- Bespoke bathroom solution
- Call our design team for help

ASPIRATIONAL GLASS

Ideal for: Shower Panels Feature Panels

Glass panels are designed to create the finest bathroom imaginable, giving a stunning depth of colour that is unsurpassed.

Shown here in Shiraz, glass is a great way to add colour into any space. The beautiful matching splash back, behind the basin, completes the look.

Our glass panels are produced in 6mm toughened glass in a range of standard colours. Further colours are available by special request, as we can now colour match our glass panels to any RAL colour.

Give us a call today, to see how our design team can help you create a unique bathroom feature.

After the special painting process the back of the panels are protected using a vinyl film to both prevent damage and stop light transition through the shower panel.

Glass is our most technically advanced product, for this reason we will supply a professional fitter to survey and install.

ELEGANT CERAMIC

Ideal for:
Shower Panels
Feature Panels

We are now offering our unique and elegant Ceramics range for those who want the look and feel of genuine ceramic tile, but with the added benefit of the Wetwall panel system.

A truly unique system from Wetwall Panels, unlike any other on the market.

Wetwall Ceramic panels are available in a range of unique designs and natural materials, all of which will give your bathroom a luxurious traditional look.

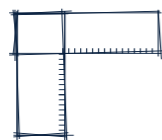

As shown to the right in our Italian Stone decor, ceramic can add a touch of glamour to any bathroom.

All our Ceramic decors are supplied with antibacterial silicones, which unlike standard silicone, will never go mouldy.

As with the rest of our range, we are so confident in our Ceramic panels quality, we offer a market leading 15 year guarantee.

BEAUTIFUL ACRYLIC

Ideal For:
Shower Panels
Feature Panels
Splashbacks

Our Acrylic panels are the ultimate modern shower panel. Developed as a cost effective alternative to glass, they will add a beautiful splash of colour to any space.

Shown here in Jewel Gloss, Acrylic works well in both traditional and modern bathroom designs. The fact that they are easy to fit and easy to maintain makes them a fantastic choice all round.

Our profiles are colour co-ordinated to the panels to make sure that all you see is a beautiful wall of colour. They are also available in a polished silver effect, if you would like to match your bathroom furniture.

Our panels are available in a beautiful glass like gloss and an elegant matt finish. We now also offer a stunning range of four digital images.

Unlike glass our Acrylic panels can be cut down on site - this makes installation a breeze and not only means any DIYer can fit, it also comes in at a much lower price than glass.

Our Acrylic panels are also 25 times more impact resistant and stronger than glass. Take a look at the next few pages for technical information on the product and to look at the whole range of decors.

STUNNING LAMINATE

Available in:
Shower Panels
Feature Panels
Splashbacks

Our Natural collection is inspired by the colours of nature and developed to look and feel like natural materials. Panels in the Natural range all have matt or textured finishes, and all are decors that complete the look of a traditional bathroom, but enable the modern Wetwall twist.

Our Boutique panels are the ultimate modern wall or shower panel. They are modern designs with colour and character, so make the perfect feature wall.

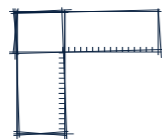

Finally our Classic collection of laminate panels, contains all of our most popular and traditional decors.

All our Laminate panels have a 9mm Core, faced in a decorative high pressure laminate, with a D4 rated waterproof glue-line and a balancing laminate on the reverse.

Laminate panels can be installed by any competent DIYer and cut easily on site.

BRILLIANT FLOORING

Available in:
Plank
Tile

Our Flooring system is both hard, stable and most importantly 100% waterproof.

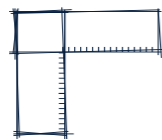

We've designed it to be perfect for any room in the house creating a warm comfortable surface perfect for bare feet. It has an R10 slip rating ensuring it's as safe as it is good looking.

Unlike tiles our waterproof flooring does not require grout so is completely resistant to mould, making both cleaning and maintenance simple. The combination of its waterproof structure and its extra tight lock, which seals out water for 24 hours, leaving time for spills to dry out or wipe clean, makes our flooring an ideal choice for both bathrooms and kitchens alike.

Effortless installation allows DIY'ers to complete the job quickly and easily using only a Stanley knife. No specialist tools or skills are required. Our Antibacterial Coating has been specially developed to protect the floor against bacteria. Its revolutionary coating formulation eliminates more than 99% of the most harmful bacteria without the use of chemical agents.

Installation Tips

	INSTRUCTIONS
Get in Touch	<p>If you are unsure about any fitting details or have a different type of installation please don't hesitate to get in contact with a member of our team at info@wetwall.com</p> <p>To make sure that the installation process is as easy as possible for you or your fitter, we have a technical helpline. This will put you through to one of the team in Scotland, who will be more than happy to help with any questions. Please call 01738 634455</p>
Cutting	<p>When cutting the panels to width and height using a handsaw, the decorative face should be facing upwards.</p> <p>When cutting with a jigsaw or circular saw, the decorative face should be facing downwards.</p>
Apertures	<p>A clearance of 2-3mm should be left where pipes or fittings come through the panel even where collars are to be fitted.</p> <p>The clearance should then be filled with Wetwall silicone sealant.</p>
Sealing	<p>If the 2 part flooring profile is not being fitted then a 3-4mm gap should be left between the bottom of the panel and the shower tray or bath by using packers when fixing panels.</p> <p>The gaps should then be sealed using Wetwall silicone sealant.</p> <p>Wetwall silicone sealant should also be used in all the corner and capping profiles.</p>
Wall Surfaces	<p>The panels can be fixed to most surfaces using adhesive, providing they are sound and free from loose particles.</p> <p>The panels can also be fixed directly onto existing tiling providing they have been de-greased. Acrylic panels however cannot be fixed over existing tiles.</p>
Fittings	<p>Fittings and shower attachments can be fixed directly to the panels using suitable fixings.</p> <p>Heavier items such as sanitary ware and accessible furniture will require the provision of additional support behind the panels.</p>
Care	<p>Wetwall panels can be cleaned using normal soap, water and a soft cloth. Alternatively a non-scratch liquid cleaner can be used. It's best to rinse the panels first and then clean off the excess water with the squeegee.</p> <p>Wiping down the laminate surface after every use will help to prevent the build up of residue and limescale. Finally, to achieve that sought-after streak free finish, remove any remaining water using a high quality microfibre cloth.</p>

Installation

	INSTRUCTIONS
Ceramic/ Acrylic/ Composite Installation	<p>The following steps assume that the panel lining surface has been prepared and the panels and trims have been cut to the required size and that they have been dry fitted to check assembly.</p> <ol style="list-style-type: none">1. Remove the protective film from the reverse of the back panel and peel back the protective film about 25mm from both the front edges.2. Fit both of the internal corner profiles to the edge of the panel by applying a bead of sealant into one channel of each of the profiles.3. A 3-4mm gap should be left between the bottom of the panel and the top of the shower tray or bath, this can be achieved by using packers which will be removed before sealing.4. Apply adhesive to the wall as detailed in Fitting Tips then position the panel against the wall applying even pressure over the surface to ensure a good bond.5. Peel back the protective film about 25mm from the vertical edge of the side panel.6. Repeat this on the opposite edge if an End Cap profile is required and fit the End Cap to the edge of the panel using a bead of sealant.7. Apply adhesive to the side wall as detailed in Fitting Tips.8. Apply a bead of sealant into the remaining channel of the Internal Corner profile.9. Insert the exposed edge of the side panel into the internal corner at an angle ensuring that a good seal is achieved, then swing the panel back into place against the side wall applying even pressure over the surface to ensure a good bond.10. Repeat steps 5-9 for the remaining side panel.11. Seal the bottom of the panels and any apertures required as detailed in the fitting tips section. <p>For further help with installation, alongside our printed instructions we also have a filmed video installation guide. 	INSTRUCTIONS
Laminate Installation	<p>The following steps assume that the panel lining surface has been prepared and the panels and trims have been cut to the required size and that they have been dry fitted to check assembly.</p> <ol style="list-style-type: none">1. Fit an internal corner profile into the corner using appropriate fixings (screws), ensuring that the heads are countersunk to prevent fouling when fitting the panel.2. Remove the film from the face of the panel and check for defects prior to cutting to size.3. Apply a bead of sealant into one side of the internal corner profile, the amount of sealant applied should cover the channel bottom to a depth of at least 2mm.4. The panels should be fitted such that a gap is formed between the bottom of the panels and the shower tray of between 3-4mm this should be filed with sealant and cleaned off flush with the front of the panels once all the panels have been fitted.5. If end cap profiles are being used then these should be fitted to the outer edges of the panel now.6. Apply a generous amount of adhesive in “snakes” to the panel and fit into place ensuring that the edge of the panel is inserted into the internal corner and a good seal achieved.7. Repeat sections 2-6 for the second panel. <p>For further help with installation, alongside our printed instructions we also have a filmed video installation guide. Ceramic/Acrylic/Composite Profiles

Laminate Profiles

OUR HISTORY

Shore
A WILSONART COMPANY

1991

Our founder tried to fit another of his businesses with panelling - the high prices, poor quality and lack of choice convinced him that there was a huge gap in the market - Shore Laminates was born.

1996

We moved to a 20,000 square foot building just down the road from the first site.

2005

Wetwall was re-branded to allow access of the product directly to consumers, with the introduction of new website and literature for both national and international market.

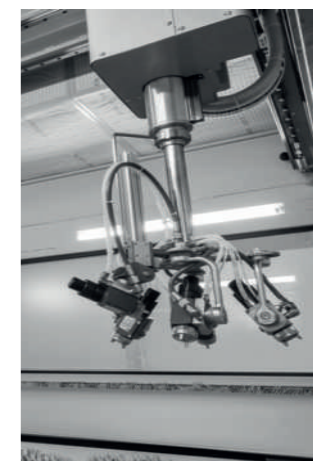

Wetwall

2014

We developed and launched our innovative, top of the range glass shower panel systems.

2017

Shore Laminates become part of the Wilsonart Engineered Surfaces European organization.

2016

We invested further in our acrylic production plant creating the best operation in Europe.

1992

We started up at a small 9000 square foot site on Shore Road in Perth, recruiting key individuals for expert posts, making the business detail led and very hands on. A sentiment which, despite the increase in size, has never been lost.

2001

National sales continued to rise as we expanded our presence south of the border.

This expansion allowed us to understand the UK market and provide the foundation for national services we now offer, and have done for the last fifteen years.

1995

Engineered systems were developed that made specifiers, and our competition, begin to sit up and take real notice.

Controls and operating procedures, which were key to ensuring the high standard of quality we required from the factory, were created and developed.

2007

Our Perth site doubled in size to 40,000 square feet as sales continued to increase.

2013

Our first antibacterial laminates were launched using microban technology.

2015

Our modern Acrylic panel system was launched in both the UK and Europe.

2019

Our new ceramic panel systems are released. Made with genuine ceramic, they have all the look and natural quality of stone or porcelain, but require no grout and are incredibly easy to fit.

ABOUT WETWALL

Website

Visit www.wetwall.com for the latest information on our ranges of decors - we're always expanding the range, so you may see something new.

We also have links to our facebook and twitter pages.

Helpline

To make sure that the installation process is as easy as possible for you or your fitter, we have a technical helpline. This will put you through to one of the team in Scotland, who will be more than happy to help with any questions.

Please call [01738 634455](tel:01738 634455)

Sample Hotline

To order a sample of any of the decors that you can see in this brochure, please call [01738 494989](tel:01738 494989)

We recommend that you see a sample before ordering any of our panels, splashbacks, vanity units or flooring.

Service

For all the reasons on this page, from our phone support to our website, we're very proud of the service that we can offer to our customers.

Distributors

We have distributors throughout the UK, visit our website for information on the nearest one to you.
www.wetwall.com/store-locator/

Our 15 year guarantee

Our panels are guaranteed to remain watertight and waterproof for fifteen years from your date of purchase. No small print. As long as they've been installed correctly, we're that confident of our system.

Installation Video

For further help with installation, alongside our printed instructions we also have a filmed video installation guide. To view go to our website:
